

# MTM Drains & Maintenance

5<sup>th</sup> January 2006

## *We could not have asked for anything more. Well done to Simply Clicks!*

Starting a new company is always a difficult time and we all know the difficulties in attracting customers during the early stages of a business. We have been delighted to use the services of Simply Clicks to produce our search engine optimised website and keep the cost to a minimum. David Burdon at Simply Clicks has managed to assist us in getting key No.1 positions within two weeks of the website launch.

We discussed a brief and budget with David. With some of our own basic IT skills, we were able to build up the site for the main pages that were designed and optimised by Simply Clicks. David was always available to give advice and point us in the right direction. We now have a site up and running. While simple in design, it is easily found and we know it will work well. It is easy for us to manage the site ourselves and update with more pages whenever we need to.

I think that many people in business always find the IT side difficult to understand and tend to be "led up the garden path" with all sorts of complications. I would recommend to anyone to use the services of Simply Clicks. It does what it says on the tin – simply, with cost effective results.

Tony Hooper,

Director
